

# KONE UniDrive®

## Maintenance and Modernisation Concept

The KONE UniDrive® is a unique product in the door service market as we believe it is the only product capable of controlling other manufacturers door operators. In addition, for modernisation and upgrade purposes, KONE have developed the KONE UniDrive® Retrofit Kit. The Retrofit product enables a full replacement of the mechanical and electrical parts of a door with new KONE parts. With this modernisation we can ensure that your door complies with the latest standards regarding safety, durability and efficiency, without making any changes to the construction of the doors.

### **The Solution**

KONE has succeeded in creating a universal solution for controlling automatic sliding doors. The KONE UniDrive® is developed especially for upgrading and repairing the control element of your door. However, in some cases it is also necessary to replace all mechanical and electrical parts of the doors. Therefore KONE has developed the KONE UniDrive® Retrofit Kit solution. This can be used without changing the appearance of your existing operator and doors. We can, of course, supply new door panels and door headers should these also be in need to upgrading.

The KONE UniDrive® meets and exceeds the latest standards regarding safety, durability and flexibility. Due to the nature of its design, it allows a doors operation to be highly customised from the most basic operational settings to the most advanced.

### **Advantages of the KONE UniDrive®:**

- No modifications needed to the existing doors or surrounding areas.
- Independent maintenance is possible
- Modular set up allowing many different configurations
- Based on over 35 years of experience in door electronics
- Service indicator and self controlling mechanism for maximum safety and efficient operation
- Small in size so can fit the smallest of operators
- Up-to-date with the latest technologies and standards
- Plug-and-play installation which decreases door down time
- Highly adjustable to meet each specific customer's requirements

### **Quality, Maintenance and Service**

When you choose a KONE product, you choose a product that guarantees the highest standards in quality, safety and durability. In addition these doors meet many international standards, for example CE-standards, ISO 9001:2000 and TÜV-certification.

We tailor our solutions to meet our customer's needs and achieve this with a combination of the best quality materials, a depth of knowledge and over 35 years of practical experience. KONE also offers a complete service and maintenance programme tailored to both the needs of your business and of your doors.

### KONE Doors

KONE Doors offer a wide range of quality sliding and swing door products for internal and external use including a Hermetically sealed door. Our total product range is equipped with the latest door technology including an intelligent control system that regulates itself continuously and guarantees a near perfect door movement.
